This mission directive prescribes the mission and establishes the responsibilities for Air Force Reserve Command (AFRC) aeromedical evacuation squadrons (AES).

**1. Mission:**

**1.1. Peacetime.** The mission of the AES is to provide training in aeromedical evacuation support to combat ground forces during contingency operations or other various conditions of heightened tension up to and including full mobilization.

**1.2. Wartime/Emergencies.** Governed by Air Mobility Command (AMC) directive.

**2. Command.** AMC gained AES are assigned to AFRC operations groups. Their peacetime structure design maintains effective operations with the least expenditure of resources and minimizes organizational turbulence upon wartime mobilization. AES functionally align for structural compatibility with their active duty counterparts.

**3. Assigned Forces.** While in peacetime status, and during 2 weeks of annual training, the AES is under the direct control and supervision of the operations group to which assigned. Under Presidential callup, pursuant to Title 10 U.S.C. 12304, administrative jurisdiction remains unchanged. Operational control transfers to the commander of the gaining command. Under mobilization authority, command jurisdiction transfers to the commander of the unit to which assigned by the gaining command.

**4. Relationship to Other Units.** Established command channels apply. Communicate directly with the active duty advisory unit/active duty advisors on matters relating to training, inspection, and safety. Send copy of such correspondence to the respective unit to which assigned.

DAVID S. SIBLEY, Brig Gen, USAFR  
Assistant Vice Commander
